

TOUCH. TRAIN. TRANSFORM.

A fully interactive touch screen overlay for plasma and LCD display panels

They're sleek, stylish and deliver high quality, high-resolution images; but are you making the most of your investment in plasma or LCD technology?

The Eclipse overlay, from Interactive Technologies, attaches directly to virtually any commercial plasma or LCD panel, from 20" to 65" delivering touch screen functionality in a matter of minutes. Whether used in the boardroom, classroom or in public information areas, shops, showrooms or exhibition environments, it will transform your flat display screen into a versatile, fully interactive, state-of-the-art and easy-to-use presentation and communication tool.

- Make your point more effectively by annotating and highlighting directly on top of the plasma or LCD display
- Simply use your finger to select, and navigate between, attached computer applications and multimedia sources
- Attaches and detaches in minutes
- Simple 'plug-and-play' set up and operation
- Offers the additional benefit of a protective screen for your plasma or LCD display

Transform

Deliver your presentations more professionally by seamlessly integrating your computer applications and multimedia sources, simply by touching the screen. Use the stylus pen to emphasise key information by annotating and highlighting. And, if you make a mistake, just rub it out with the eraser tool supplied.

It's as easy to use as a flipchart or whiteboard, only more versatile, dynamic and engaging, plus there are no shadows as experienced with interactive whiteboards. There's now no longer any need to carry around rolls of paper to copy the notes after a brainstorming session; the notes you make on screen can be saved and then emailed to everyone after the meeting.

Train

You won't need any training to operate it, either - it's that simple; but it will transform the way you train others. It is well documented that the human memory responds best to visual stimulants. A touch screen overlay makes it easy to utilise video, DVD and computer-generated imagery to capture and hold the attention of your audience, ensuring your key messages are made with maximum impact.

It saves you time and money, too. Hooked up to video-conferencing equipment, it enables you to present the same information, in the

same format, across multiple locations; not only helping you communicate with more people at one time, but also ensuring continuity and consistency of message - throughout your organisation. Again, any notes you make can be saved and forwarded by email for further assimilation.

Touch

Beyond enabling more effective and professional presentations, training and education, a touch screen overlay is also a flexible and versatile tool in public access environments.

Whether used to deliver an interactive presentation in retail outlets and corporate lobbies or integrated within a public information kiosk, with a touch screen overlay it's now much easier to benefit from touch screen functionality to engage people directly.

At exhibitions, it can be a real show-stopper. Touch screens are a great way to draw people to your stand; and keep them there. Used with an engaging and interactive computer programme, the Eclipse overlay can transform a plasma or LCD monitor into a data capture tool. What's more, the overlay is robust and durable and offers protection for your screen.

Technical Specifications - Plasma and LCD Interactive Overlays

Model	W x H x D (mm)	Fits
LCD420	411 x 355 x 20	LG, Sharp, Samsung 20" LCD
LCD424	636 x 554 x 20	Samsung 24" LCD
LCD430	746 x 489 x 20	JVC, LG, NEC, Sharp, Samsung, Sanyo 30" LCD
LCD432	812 X 525 X 20	Samsung 32"LCD
LCD437	988 x 611 x 20	Sharp 37" LCD
LCD440	988 x 644 x 20	Barco, Iiyama, JVC, NEC, Samsung, Sanyo 40" LCD
LCD442	1028 x 635 x 59	LG 42"LCD
PL432	880 x 556 x 20	Hitachi, Sony 32" Plasma
PL442	1071 x 674 x 20	Fujitsu, Hitachi, JVC, NEC, Panasonic, Philips, LG, Relisys, Samsung, Sanyo, Sony, Vision 42" Plasma
LCD445	1152 x 690 x 20	Sharp 45", Panasonic 45" LCD
PL450	1252 x 766 x 20	Fujitsu, Hitachi, JVC, LG, NEC, Panasonic, Philips, Pioneer, Relisys, Samsung, Sanyo, Sony, Toshiba 50" Plasma
PL455	1389 x 828 x 122	Fujitsu, Hitachi 55" Plasma
PL360	1610 x 1020 x 66	LG 60", NEC, Pioneer, Sony 61" Plasma
PL463	1405 x 835 x 122	Fujitsu, Samsung 63" Plasma

N.B we can fit most commercial monitors 20"-65"

Touch screen Type:

Resistive Membrane with anti scratch and anti reflectivity coating

Warranty:

3 year return to base, upgradeable to onsite (UK)

Windows operating systems:

Pentium® 150 MHz processor (Pentium II processor or later recommended)
32 MB of RAM (128MB Recommended)
Windows 98SE, Windows NT® 4.0 (SP-6) operating system or later recommended
210 MB of free hard disk space for complete installation of Interact Software and business or education clipart

Colour:

Satin Silver (other colours available at small charge)

Cable Length:

5M USB (extendable to 25m using USB cable repeaters)

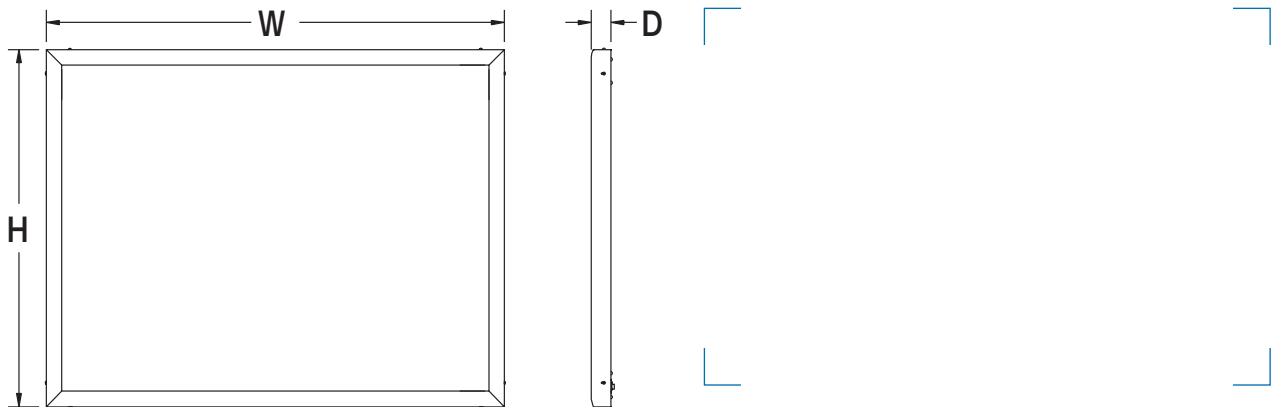

Power Supply:

Simply connect to your computer via USB or serial. It uses less than 5mA via the connection

Other Features:

Interact software - Windows
UPDD Driver - Windows, Macintosh OSX and Linux
Optional mobile stand

Manufactured in the UK

ITL reserve the right to change the product specifications without notice
